

Designed Today... to Fulfill the Needs of Tomorrow

A longtime leader in office, safety, and air distribution innovation, Deflecto adapted its engineering, design, and manufacturing capabilities to develop a line of personal protection equipment and safety products to help our customers get back to business quickly and protect employees and consumers against viruses.

What We Offer

In-house engineering and prototype capabilities

Domestic and global manufacturing and sourcing

Dedicated US-based customer service

Over **60** years of proven innovation and reliability

Safety Barriers

Having the right protection in place for frontline workers is critical. Deflecto's safety barriers provide a layer of defense against airborne viruses and other pathogens to which these employees may otherwise be exposed. Our range of barriers include counter/tabletop, mountable and hanging options to fit any space.

Disposable Face Shields

Deflecto's high clarity, anti-fog face shields serve as a first line of defense by protecting workers' eyes, noses and mouths from airborne droplets that may contain viruses and other pathogens. By covering an individual's face completely, these face shields also help protect others in close proximity from illnesses. Dual-sided protective film protects face shields from scratching in transit. Non-medical grade.

Why Deflecto:

- Constructed from high quality 3/16 in. thick acrylic and 1/8 in. thick impact-resistant polycarbonate
- Co-extruded from resin to control quality and durability
- Crystal clear – won't impede vision
- Radiused corners; no sharp edges
- Generous barrier sizes and pass through cutouts
- Arrange side-by-side for longer runs
- Quick, easy assembly - no tools needed
- Custom capabilities

- Anti-fog protective shield
- Provides a clear unobstructed view
- Soft cushioned foam head pad safe for skin contact
- Fits over glasses
- Adjustable band
- Disposable and lightweight
- Non-medical grade
- Dual-sided protective film prevents scratching during transit
- Made from .3 mm clear PET plastic
