

DEFLECTO'S AIRTIGHT TECHNOLOGY

“THE NEW
INDUSTRY
STANDARD”
IN DRYER VENTING

Airtight™
FUSION SEAM

deflecto®

Deflecto's patented Airtight Fusion Seam dryer venting products are designed to improve one of the largest energy consuming appliances in the home.

CAN BE USED ACROSS ENTIRE DRYER DUCT SYSTEM.

PROBLEM:

EPA confirms that more than **2/3** of U.S. houses have significant duct leakage

80%

of U.S. homeowners and

70%

of renters main concern is indoor air quality

45%

cited dampness and mold as top concern

40%

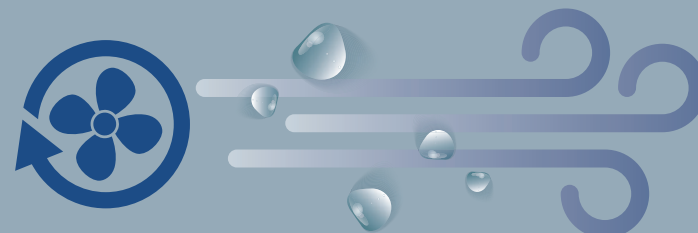

have taken action or have firm plans for action on mold removal

SOLUTION:

5x

better airflow over standard dryer venting; less leakage

**ELIMINATES
CHEMICAL
RESIDUE**

from detergents and fabric softeners

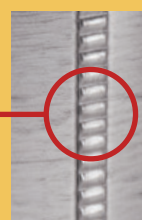

**HELPS PROVIDE A
HEALTHIER HOME**

by stopping moist air from entering walls that can lead to mold and mildew

**LONGER
LASTING**

patented fusion seam creates a rigid, one-piece seal that won't warp or fall apart

**MORE EFFICIENT/
SAVES ENERGY**

with shorter drying times; eliminates leaks to allow dryer to operate at peak performance and perform closer to the appliance manufacturer's specifications
